Dear Sir,

Subject: Vacancy announcement for the position of Project Manager for Climate Systemized Flood Management and Mitigation (Re-announcement)

The MRC Secretariat would like to re-announce an opening in the position of Project Manager for Climate Systemized Flood Management and Mitigation attached to the Flood Management and Mitigation Programme (FMMP), Technical Support Division. We would therefore like to forward to you the vacancy announcement and the job description for the above-mentioned position for your kind consideration and action.

The vacancy announcement will soon be advertised in The Nation newspaper. In order to access a larger pool of candidates, the Secretariat will post the vacancy on well-known national job-listing websites including: www.jobsdb.com, www.jobthai.com, MRCS Recruitment Channels Network, and will obtain the applications of potential candidates from head-hunting companies. We would be grateful if you could widely and actively distribute this vacancy to relevant ministries and line agencies.

The closing date for the applications is 11 December 2012. We would appreciate it if you could forward the applications to the MRCS by 25 December 2012 so that the recruitment can be processed according to its timeline.

Thank you for your continued support.

Yours sincerely,

Hans Guttman
Chief Executive Officer
Mekong River Commission Secretariat

Permanent Secretary
Ministry of Natural Resources and Environment
Vice-Chairman of Thai National Mekong Committee
Member of the MRC Joint Committee for Thailand
Chairman of the MRC Joint Committee for 2012-2013
Thai National Mekong Committee
Department of Water Resources
180/3 Rama 6 Road, Soi Phibul Watana Building
Phayathai, Bangkok 10400 Thailand

ผู้อำนวยการสำนักบริหารกลาง

Mekong River Commission

The role of MRC is to promote and coordinate sustainable management and development of water and related resources for the countries' mutual benefit and the people's well-being

MRC Secretariat is now recruiting a highly qualified candidate for the position of

**Project Manager for Climate Systemized Flood Management and Mitigation
Development & Services Unit (DSU),
Flood Management and Mitigation Programme, Technical Support Division
Post level: M-11
(Re-announcement)**

The Project Manager will be responsible for the portfolio of activities. He/she will need to develop a methodology for assessing the likely impacts of future climate change on the hydro-meteorological regime of the Lower Mekong Basin (LMB); develop an implement an action plan to assess the likely impacts of possible climate change on flood behavior and flood risks; design and implement Pilot Projects to demonstrate important climate change adaptation initiatives in the MRC member countries. The position is based at the Office of the MRC Secretariat in Phnom Penh, Cambodia.

The job description and other information can be obtained at MRC website <http://www.mrcmekong.org/working-with-mrc/employment>. Qualified female candidates are encouraged to apply. Only short-listed candidates will be notified.

Closing date for applications: 11 December 2012

Application procedures:

Only nationals of Cambodia, Lao PDR, Thailand and Viet Nam are eligible to apply. The application should include (i) a cover letter outlining clearly how the candidate meets the requirements of the position, (ii) a detailed CV, and (iii) MRC Personal History Form. The position title and section/division must be indicated in the cover letter. The application should be sent to the National Mekong Committee in the applicant's home country.

JOB DESCRIPTION

Updated: June 2012

Title: Programme Officer
Functional Title: Project Manager, Climate Systemized Flood Management & Mitigation, Development & Services Unit (DSU), Flood Management and Mitigation Programme (FMMP)
Division: Technical Support Division
Level of post: M-11 (Riparian Professional)¹
Duration: One-year contract renewable
Location: MRC Secretariat, Phnom Penh, Cambodia
Reporting to: Programme Coordinator, Flood Management and Mitigation Programme

1. THE MEKONG RIVER COMMISSION

The Mekong River Commission (MRC) was established by the 1995 *Agreement on Co-operation for the Sustainable Development of the Mekong River Basin*, between the Governments of Cambodia, Laos, Thailand and Viet Nam. In accordance with this Agreement, the Mission of MRC is: "To promote and coordinate sustainable management and development of water and related resources for the countries' mutual benefit and the people's well being by implementing strategic programmes and activities and providing scientific information and policy advice." The Mekong River Commission Secretariat operates since December 2010 through "co-hosting" by the Office of the Secretariat in Vientiane, Lao PDR (OSV) and the Office of the Secretariat in Phnom Penh, Cambodia (OSP).

2. THE FLOOD MANAGEMENT AND MITIGATION PROGRAMME

The Flood Management and Mitigation Programme (FMMP) is one of the MRC programmes. FMMP is operating under the Technical Support Division (TSD) of the Office of the Secretariat in Phnom Penh. The overall development objective of the FMMP is: 'People's suffering and economic losses due to floods are prevented, minimised, or mitigated, while preserving the environmental benefits of floods'. The FMMP 2004 – 2010 consisted of five components: 1. Establishment of a Regional FMM Centre, 2. Structural Measures and Flood Proofing, 3. Enhancing Cooperation in Addressing Trans-boundary Flood Issues, 4. Flood Emergency Management Strengthening, and 5. Land Use Management. Under FMMP 2004-2010 the Regional Flood Management and Mitigation Center (RFMMC) was established in 2006 in Phnom Penh, Cambodia. The follow-on of FMMP 2004-2010 is FMMP 2011-2015. Under the MRC Strategic Plan 2011-2015 the FMMP 2011-2015 is designed as a support programme to the RFMMC¹.

The FMMP 2011-2015, which was approved by the MRC Joint Committee in March 2011, is addressing the priorities agreed upon by the four MRC member countries and the strategic goals of the MRC. The FMMP 2011-2015, like other recently updated MRC programmes, has been structured such, that it will tangibly contribute to and support the MRC Strategy Plan 2011-2015. The programme is therefore no longer structured around components, but merely in groups of activities linked to outputs and outcomes, which contribute to the MRC Strategic Goals 2011-2015. The RFMMC distinguishes management-, operational- and development functions. The operational (routine) functions are delegated to the Operations Unit (OU); the development functions by the Development & Services Unit (DSU). The DSU will implement the various sets of development

¹ Reference is therefore made to RFMMC/FMMP (RFMMC, being the established center providing MRC core functions through its products and services to the MRC Member countries) and FMMP (being the support programme to the RFMMC).

activities with the aims at enhancing and broadening the operational (routine) functions and support services to the MRC Member countries, which are formulated through the expected outputs and outcomes of the FMMP 2011-2015.

3. JOB SUMMARY

The Project Manager reports to the FMMP Coordinator and will be fully responsible for the portfolio of activities, which will be assigned by the Programme Coordinator. These will refer to among others: the impact of climate change on short, medium and long term flood and drought behavior and climate change adaptation systemized in the RFMMC and the MRC member countries. Priority will be given systemize climate change into short term flood forecasting and medium and long term flood simulation modeling. He/she will need to develop a methodology for assessing the likely impacts of future climate change on the hydro-meteorological regime of the Lower Mekong Basin (LMB); use flood simulation models to assess impacts of the changed hydrometeorological regime; develop an implement an action plan to assess the likely impacts of possible climate change on flood behavior and flood risks; design and implement Pilot Projects to demonstrate important climate change adaptation initiatives in the MRC member countries.

Coordination with MRC Programmes (like BDP, EP/CCAI, IKMP and DMP) is vital to align with and use MRC experiences re. approaches and methodologies, and to assess and identify conditions and develop schematizations for flood simulation modeling applications.

The Project Manager will be responsible for the day-to-day management of these activities, and will operate in close collaboration with the CTA and other staffs of the RFMMC/FMMP team. Programme Coordinator, Project Managers and CTA form the Programme Management Unit (PMU).

4. KEY TASKS

The incumbent performs the following tasks:

- Is responsible for the day-to-day management the assigned development activities;
- Develops conceptual notes and strategic reports to guide decision making within RFMMC/FMMP;
- Prepares and updates action plans for implementation;
- Coordinates the implementation of the assigned activities; this includes organising and facilitating implementation plans, technical studies, training, etc;
- Disseminates and discussed progress information and eventual difficulties / bottlenecks at the PMU;
- Facilitates inter-institutional co-ordination and collaboration, and secures full involvement of the appropriate management levels;
- Secures the projects administration by developing and implementing management procedures;
- Works with the National Mekong Committees (NMCs) and national line agencies in the MRC member countries to ensure participation of appropriate Line Agencies in the implementation of the activities;
- Prepares progress and activity reports, internal performance assessment, completion reports and other reports in accordance with MRCS procedures and related specific requirements;
- Controls recruitment of staff and consultants, and prepares the Terms of Reference and budgets for project staff and consultants;
- Controls quality management of the activities;
- Controls the Terms of Reference and budgets for Country Task Groups and sub-contracts with Line Agencies;

- Supports the NMCs to ensure effective coordination with the Line Agencies and other important stakeholders;
- Provides information to the NMCs and National Centers / Line Agencies in order to ensure their awareness of and involvement in the planning and implementation of projects and activities;
- Anticipates the need for the provision of relevant information to the MRCS-CEO, the National Mekong Committees, the MRCS, and the various RFMMC staffs;
- Carries out other related duties as may be assigned by the FMM Coordinator.

5. SCOPE OF AUTHORITY

- (a) **Supervision requirements:** The incumbent supervises any assigned staffs and / or International / National Consultants, and is responsible for their performance assessment.
- (b) **Level of autonomy:** Decisions are generally recommendatory in line with MRC policy.
- (c) **Level of problem solving required:** Problem solving is complex and the incumbent must display initiative and creativity.
- (d) **Level and type of communications required:** Communications are wide, both within and outside of the organisation, and a variety of written documentation is required of the position.

6. COMPETENCE REQUIREMENTS

- (a) **Core Values:** Integrity, professionalism and respect for diversity.
- (b) **Core Competencies:** Communication, teamwork, planning and organising, accountability, creativity, client orientation, commitment to continuous learning, and technological awareness.
- (c) **Managerial Competencies:** Vision, leadership, empowering others, building trust, managing performance, and judgement/decision-making.

7. POST-SPECIFIC QUALIFICATIONS

- A post-graduate degree in water resources management, flood management, river- or hydraulic engineering or similar field. At least 10 years of professional experience at management level in the field of water resources management, flood management, river- or hydraulic engineering or similar field, preferably in a multi-cultural or international organization.
- Have proven experience in complex project planning, programming, execution and coordination.
- Possess good understanding of climate change and sea level rise, of hydrological and hydrodynamic modelling, of different climate models, of future climate impacts in terms of variability and extremes, of using climate factors into recorded rainfall time series, and of adaptation processes.
- Possess good project management, communication, organizational and coordination skills

Language: Excellent command of verbal and written English and one riparian language is a must
